

FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform

1. Brainstorming & Ideation

Problem Statement

Many borrowers struggle to manage debts, evaluate financial health, negotiate settlements, and understand borrower rights.

Project Idea

Develop a full-stack web application using React, FastAPI, SQLite, and AI to assist borrowers in debt recovery.

Objectives

Provide secure authentication, financial analysis, loan management, settlement prediction, negotiation email generation, and borrower rights guidance.

Scope

Support registration, login, dashboard, loan management, financial health, AI services, and history tracking.

Technology Stack

React.js, Vite, FastAPI, Python, SQLite, Axios, JWT, GitHub, Google Gemini API (with fallback).

Expected Outcome

A secure, scalable, responsive debt relief platform with AI-assisted financial guidance.
